

## Educational Webinar for Business Executives:

# *“How to put an end to your content chaos and improve staff efficiency”*

Wednesday, May 9, 2018

10am – 11am CST

[Register for this free event at mxotech.com/webinar](http://mxotech.com/webinar)

*Ever find yourself losing things in an Email Blackhole? Feel like you're wasting time looking for a document because you're not sure if it was an attachment, saved to your network drive or into a file share like SharePoint?*

MXOtech's Enterprise Information Management (EIM) and Quality Management System (QMS) solutions can end your frustration!

Get the freedom to access anything,  
anywhere, at any time.

### **During this Webinar, you'll discover:**

- The dangers of paper-based document management
- How features like electronic document signing can enable seamless communication of invoices or project contracts across departments
- An integrated solution to disconnected information silos that allows for increased collaboration
- How changing your approach to quality and compliance can create documentation consistency
- The innovative new way to make sure your business is NEVER tethered to an information management system

### **Who should attend?**

C-Level executives and managers who are curious how to organize contracts and other files in such a way that will save time and allow your team to access business information anytime, anywhere. Whether currently working with, or searching for, an IT vendor to help leverage technology, attend this presentation if you want more details on how to improve efficiency, productivity, or communication of your documents.

This is of particular importance for organizations that heavily rely on the exchange of information to operate, especially those in industries like manufacturing/distribution, energy/utilities, or healthcare.

This presentation will be most valuable to businesses with 25+ computers.
